

## MEDICAL ADVISOR IMMUNOLOGY FIELD BASED SWEDEN

### Your new role

On behalf of Janssen, Hays is looking for a Medical Advisor Immunology Sweden who will focus primarily on Stelara® and Tremfya®. The Medical Advisor is responsible for becoming a scientific and clinical expert on the Janssen's Immunology portfolio - with focus on dermatology, gastroenterology and rheumatology - and its related clinical areas and competitors. With this expertise, the field based Medical Advisor provides clinical and scientific support to internal and external customers in the Nordic countries. The target customers include Sales & Marketing and Clinical Development as internal customers and key opinion leaders as external customers.

You will be based in Sweden and report directly to Therapeutic Area Head, Immunology.

### Responsibilities:

- Be regarded as an expert on the Immunology product by target customer groups, i.e. internal customers, commercial partners, key opinion leaders and specialist within the therapeutic area
- Develop clinical and technical expertise on Janssen's Immunology products and its related medical fields and competitors
- To maximize the company product's value through high scientific quality communication with leading specialists on a peer-to-peer basis
- Be the primary contact for Immunology and their supporting teams in the relevant clinics
- Ensure communication of scientific information about clinical studies, clinical data and products
- Implement and coordinate clinical trial programs & activities and other related research activities
- To organize Medical Education activities including program development, speaker selection and support
- Provide marketing and sales, and other internal stakeholders, with medical training, support, feedback and intelligence regarding the market environment and clinical strategies within the Immunology area
- To support the set up and follow up of registries and other non-interventional Medical Affairs studies
- To participate in investigator meetings preparation, recruitment follow-up and study result presentation
- To maintain updated knowledge about clinical activities and studies conducted within the therapeutic area in their region.
- To act as a reference point to Area Account Managers for any scientific query, in collaboration with Medical Information as appropriate.
- To provide input to the company Medical Affairs Plan.
- Give support to medical review of marketing material and regulatory texts (SPCs)

### What you'll need to succeed

#### Experience / Skills:

- MD or university degree within Science or Pharmacy. PhD in life sciences is a merit
- Prior clinical and / or scientific expertise in Immunology is *desirable*
- Previous industry experience in a medical or scientific role is a merit
- Strong commitment to create value for the Immunology community
- Fluent in the Swedish language and capable of effective communication in oral and written English language
- Customer focused
- Good presentation skills

Personal skills:

- Open to assimilate and support other therapeutic areas if/when needed
- Collaborative mindset
- High level of flexibility: action and result oriented
- High level of self-motivation, proactive attitude, high-level of responsibility for customers' needs and demands
- Strong in building personal relationships
- Natural authority and leadership
